A JOURNEY FROM KINZA TO ABDULLAH A MOTHER'S ACCOUNT

When I gave birth to my second child, we were not clear about his/her gender. We believed her to be a girl, so we named her as Kinza and we sent her to a girls' school. When Kinza grew up to the age of 12, she started suffering from severe stomach aches. We took her to a doctor, but he referred her to the Birth Defects Foundation. After conducting various tests, they told us that Kinza was not a girl but a boy. They then treated her and operated her thrice after which she became a 100% normal boy. Now her name is Abdullah and a lot of kids like Abdullah are waiting for their surgery. ARY TV made and broadcasted a report about it. We now feel very delighted and gratified.

Birth Defect Foundation is providing free treatment for above 18 types of birth defects in children especially to the children with ambiguous gender and those having cleft lips and palates as well as transgenders. Besides that, Birth Defects Foundation has General OPDs, Ultrasound, ECG, General Checkup and Free Medicines facilities in Lahore, Karachi and Rawalpindi. The CAH 46 XX type of children have ambiguous gender and they have to take two medications namely (i) Tab Hydrocortisone 20mg; and (ii) Tab Florinef 10 mg, for holetime in order to control their hormones. Birth Defects Foundation is providing these medicines to around over 200 children on monthly basis for 100% free of cost.
