Donor Tahira Jaweed Ch,
Nooreen A Khan**

OUR PROFILE

BDF is focusing on more than 18 types of birth defects such as Intersex, Cleft, Pallet, Anisometropia, Clubfoot, Spina Bifida & Thalassemia etc. which are often found in infants across Pakistan. Patients approach us from all over the country especially Azad Kashmir, Bilbistan, KPK, interior Punjab Baluchistan and Sindh. We are raising awareness in our society and working hard to make these children stand against violence, discrimination and stigma that often surround intersex children and adults.

Our Current Challenge

We are bound to use operation theaters of different hospitals because currently, BDF does not own any hospital for their surgeries. We are striving hard to give our patients all the facilities such as 100% free operation and treatment under one roof. For this purpose Birth Defects Foundations launching a Fund-raising campaign in order to raise funds to build a hospital.

You can donate 15 to 20 acres of Land for our Hospital or any size of donation which could be benefit in building of unique Hospital for the treatment of Intersex, Cleft Pallet & 18 types of Birth Defects Children.

Successful surgeries of Cleft Pallet Patients

Your support will be truly appreciated

Stats of Birth Defects Foundation surgeries:

- Intersex Surgery (Clarity of Gender) 144
- Cleft & Pallet Surgery 12,626
- Other 18 type of Birth Defects Surgery 441

Wg/Crd®(Late) Jaweed Hafeez Ch & Mrs. Tahira Jaweed Ch

1st Tahira Jaweed Chaudhry E-health Care & Rehabilitation Centre for Intersex, Transgender, Cleft, Pallet & other 18 types of Birth Defects, Supported by (Late) W/CRD Javeed Hafeez Chaudhry & Co.

The aim of E-Health care center of Birth Defects Foundation is to connect 20 different cities of PAKISTAN. It will facilitate both doctors and patients especially from distant areas. Our most of the patients are poverty-stricken and can't afford regular visit to Lahore for consultation. Due to this reason, most of the patients give up on the treatment. Since prior to the surgery patients have to consult doctor time to time for up to six months regularly. To make it easier, BDF is Introducing E-Health centers Where gadgets attached with Laptop and electronic assets will be connected to provide the necessary guidance to the patient and only for the surgery, the patient will have to

If you want to sponsor an e- health center in your selected city, it will be **Entitled as per your preference(Such as: the name of your loved ones/company name & Logoetc).**

One-time cost of the centre includes advance rented place, security, renovation, medical equipments, e-health gadget, laptop, LED , Ultrasound machine, Furniture, Fan and AC etc.

Monthly running cost includes doctor, ultrasound expert, paramedical, house keeping, management staff salary, medicines, utility bills, and other minor expenses.

Birth Defects Foundation will provide complete details for your satisfaction that your donation is reaching the right place. & In The Right Hands

Psychological – Rehabilitation Support for Intersex & Transgender:

Birth Defect Foundation is not only providing surgical treatments but also consultation facility and psychological assistance to Intersex, Transgender Children/Adults and their families.

Our Team of Professional Psychologists is in the process of conducting the treatment and rehabilitation of such patients.

Rehabilitation of Intersex & Transgender patients is done to make them a useful citizen of Pakistan. For this purpose we are planning to arrange, Vocational training program of beautician, chef, tailoring, computer, IT, Ac, TV, fridge course etc.

Difference between Intersex & Transgender community

Intersex children are born with some defects naturally. After few tests we identify the gender and provide treatment according to it. We do not change the gender on wish but do correct the structural defects.

Transgender are born with totally clear gender at the time of birth i.e. either boy or girl. With passage of time approximately from 3 years to any age psychological disorder arise in them. Due to that reason mostly, males start adopting the female appearance and vice versa. Such patients are not intersex but normal humans with clear gender and they only have the psychological disorder. In European & American medical books it is termed as "Gender dysphoria". Their treatment could take 6 months to 1 year. Intersex and transgender both exist in our society. We love both equally and want to help those 100% free in most possible manner.

Intersex

Media Supports Nationally & Internationally
